It introduces templates and reusable report elements and demonstrates how to create advanced interactive reports using prompts to control sorting and display options, with hyperlinks for navigation and embedded HTML to provide tooltips. Also covered is the automatic distribution of filtered reports to user groups using bursting and master-detail report concepts.

Duration - 2 days

Barrachd creates intelligent analytics solutions. We work with cutting-edge technology, pushing it to its limits to create solutions that solve problems for some of the country's best-known businesses.

Our job is to help our customers piece together the data that they have to ensure they have all the answers they need, exactly when they need them. Intelligent analytics isn't just about using the best technology, though. We get under the bonnet of our clients' business, understanding their pains and problems to ensure we create the very best solution, tailored specifically to their needs.

Our analytics consultants are amongst the best and most experienced in the UK. It's their thinking and experience, married with industry-leading technology, that provides the foundation for everything we do.

Find out more about what we do, how we do it and who we work with at www.barrachd.com

Cognos BI Framework Manager

Design Metadata Models provides participants with introductory to advanced knowledge of metadata modelling concepts and how to model metadata for predictable reporting and analysis results using Framework Manager. Participants will learn the full scope of the metadata modelling process from initial project creation, to publishing of metadata to the Web, enabling end users to easily author reports and analyze data.

Duration - 3 days

Cognos Planning Analyst and Planning Manager

Provides an overview of Cognos Planning and the navigation and development skills to build and maintain budgeting and forecasting models in Analyst and Manager. This includes building D-Lists, D-Cubes, D-Links, Allocation Tables, D-Cube Allocations, Data Input and Importing Data via File Maps, Conditional Formulae, Overview of Built in Functions, Macros and Excel-Add-In, Publishing and Exporting data, User Maintenance and Administration.

Duration - 2 days

In addition to these courses we also offer bespoke training designed around your own specification and needs. Our customised training ensures that we focus on what you need to know and no time is wasted on subject areas that are just not relevant.

The location of the training is entirely up to you too. It can be delivered in the Barrachd office in Edinburgh or in-house either at your premises or a location that suits you.

All our courses are Barrachd run, using an accredited IBM trainer. If you would like more information please call **0131 564 0575** or email nikki.walker@barrachd.com to book your course today.
